Tan steamer Kwonghoi (Captain Mackenzie), which arrived in Manila on the 12th instafrom Calbayog, in the Island of Samai, re--ports the disappearance of the chief officer under peculiar circumstances. He was invited ashore to a native fiests from which he returned beter in the evening. Having occasion to inspect the deck, he discovered six of the native crew breaking into the treasure room which contained a large sum of money for the purchase of hemp. Upon being discovered, the men attacked him, beat him over the head with clubs, and whilst he was in an insensible condition either threw him into the sea or into a boat al ngside. They then abstracted two cases of \$5000 each from the treasure room, and made for shore in the ship's boat. Since then nothing has been heard of the men or the mate. The captain supposes that the suilors had made arrangements, on previous voyages, with their co-conspirators on shore, as this steamer frequently takes large sums of money each trip to the agencies of the firm along the coast.

Shortly afterwards Lo Fung and five others sat down to their meals. After eating their meals five of them who had been eating the vegetables became giddy and subsequently entirely unconscious. They remained unconscious for some considerable time-for some hours, because when they recevered consciousness they were in the Government Civil Hospital, where they remained until the next day. AMERICAN TRADE WITH HONGRONG. EXTRACTS FROM CONSUL-CENERAL WILDMAN'S

REPORT. The following paragraphs are from Consul-General Wildman's annual report:— DEER, BICYCLES, TINNED MEATS AND

Since the arrival of the American squadron, at least three brands of American beer have firmly established thomselves here and one brand of whisky. Canned meats and fruits have also come to stay. Our bicycles are favourites; but as the opportunity of using them is restricted, the demand can never be great or worthy of serious competition. Within the last three months, the agent of an American sewing machine obtained an order for 1,200 machines from an English firm, and at the same time an order for a considerable number of bieyeles, which his company bakes with the same plant that they use for the sewing machines. There will be an increasing demand for cheap sewing

measures ought to be taken to control the MANILA TRADE. For the half year ended September 30, 1893, the exports from this colony to the United States, as throise Lin this consulate, amounted to \$4,843,016 Mexican. In comparison, the exports to Manila between the dates August 18th and September 30th. as recorded in this consulate, amounted to arrive at a true conception of the vast volume of imports that poured into Manile during the forty two days cited, it would be necessary to multiply this by two, to cover the value of the transit cargoes that

machines among the Chinese, and energets

were not invoiced in this office. THE BENEFIT TO HONGKONG OF POLITICAL It is an interesting fact that, on account

of its geographical position, the colony of Hongkong benefits commercially by political upheavals of any nature that occur on the entire Asiatic coast. If a rebellion breaks out in southern China, both the rebels and the Government come to Hong keng for their munitions of war, and, al though the colonial government has for the past year forbidden the export of arms, thousands of Mauser rifles have found their way into the rebellions districts numerous rebellions in the Philippine Islands that have occurred in previous years, have made big demands upon this market for the sinews of war.
